Wikipedia

From Wikipedia, the free encyclopedia

This article is about the online encyclopedia. For Wikipedia's home page, see [Main Page](#). For Wikipedia's visitor introduction, see [Wikipedia:About](#). For other uses, see [Wikipedia \(disambiguation\)](#).

"The Free Encyclopedia" redirects here. For other encyclopedias, see [Lists of encyclopedias](#).

Wikipedia ([/wiki/pidie/](#) () [wik-iH-PEE-dee-e](#) or [/wiki/pidie/](#) () [wik-ee-PEE-dee-a](#)) is a multilingual online encyclopedia created and maintained as an open collaboration project^[3] by a community of volunteer editors using a wiki-based editing system.^[4] It is the largest and most popular general reference work on the World Wide Web,^{[5][6][7]} and is one of the most popular websites ranked by Alexa as of October 2019.^[8] It features exclusively free content and no commercial ads, and is owned and supported by the Wikimedia Foundation, a non-profit organization funded primarily through donations.^{[9][10][11][12]}

Wikipedia was launched on January 15, 2001, by Jimmy Wales and Larry Sanger.^[13] Sanger coined its name,^{[14][15]} as a portmanteau of "wiki" (the Hawaiian word for "quick"^[16]) and "encyclopedia". While it was initially an English-language encyclopedia, versions in other languages were quickly developed. With at least 5,972,329 articles,^[note 3] the English Wikipedia is the largest of the more than 290 Wikipedia encyclopedias. Overall, Wikipedia comprises more than 40 million articles in 301 different languages^[17] and by February 2014 it had reached 18 billion page views and nearly 500 million unique visitors per month.^[18]

In 2005, *Nature* published a peer review comparing 42 hard science articles from *Encyclopædia Britannica* and Wikipedia and found that Wikipedia's level of accuracy approached that of *Britannica*,^[19] although critics suggested that it might not have fared so well in a similar study of a random sampling of all articles or one focused on social science or contentious social issues.^{[20][21]} The following year, *Time* magazine stated that the open-door policy of allowing anyone to edit had made Wikipedia the biggest and possibly the best encyclopedia in the world, and was a testament to the vision of Jimmy Wales.^[22]

Wikipedia has been criticized for exhibiting systemic bias, for presenting a mixture of "truth, half truth, and some falsehoods",^[23] and for being subject to manipulation and spin in controversial topics.^[24] In addition, Wikipedia has gender bias, particularly on its English-language site, where the dominant majority of editors are male. However, Edit-a-thons have been held to encourage female editors and increase the coverage of women's topics.^{[25][26]} Facebook announced that by 2017 it would help readers detect fake news by suggesting links to related Wikipedia articles. YouTube announced a similar plan in 2018.^[27]

“ It is in this light that we must recognize that only a restoration of open-source culture, and all that enables across the full spectrum of open-source possibilities, can allow humanity to harness the distributed intelligence of the collective and create the equivalent of heaven on Earth – in other words, a world that works for all.

The Open-Source Everything Manifesto

Over the last few decades, with the emergence of open-source software, we've experienced an unprecedented acceleration in the development of our digital infrastructure, one that has become a new commons – a public good we are now collectively responsible for. But we are all familiar with cases like Heartbleed, [1] with developer burn-out, [2] with projects acquired by ill-incentivized or incompetent parties. [3] [4] Today, many valuable OSS projects are unable to define themselves in traditional market terms, [5] while others find it incompatible with their ethics and struggle without financial support.

But what if we had the means to improve upon this? What if we could create a decentralized network run by the community and contributors, with a sustainable economy to back it – one in which profits would be redistributed back to those who created value in the first place?

The screenshot shows the Beaker browser homepage with a dark blue header. The header features the Beaker logo, navigation links for Explore, About, Documentation, and an 'Install Beaker' button. Below the header, a large section highlights the browser as 'A browser for the next-generation Web'. It includes a brief description: 'Beaker is an experimental browser for exploring and building the peer-to-peer Web.', two calls-to-action ('Install Beaker' and 'Take a tour'), and a preview of a file structure titled 'PIXEL-EYEZ' with files like fonts, images, and index.html. Below this, there's a section with five user reviews and a 'Show more ▾' link.

Props to @pfrazeet 🎉 and @taravancil 🎉 who are building the future of the Web! Go download @BeakerBrowser and see for yourself! ↗ ↘ ↙ ↚ ↛

"The new @BeakerBrowser dev experience is good. Really good."

"wow it is SO fun to get stuff up SO FAST on the p2p web using @BeakerBrowser"

"Creating my first WebApp in @BeakerBrowser and it's so much fun! Finally feel like I am starting to understand javascript..."

"if you like p2p tech, check out @BeakerBrowser. so far the smoothest onboarding to a p2p network via the browser. well done 🎉"

Full Node is the space for blockchain and web 3.0 initiatives to work and collaborate.

As Europe's largest co-working space for web 3.0 technology, Full Node features private offices, fixed desks, and an open area which hosts regular, vibrant meetups from projects at the forefront of the space.

Companies [Gnosis](#) and [Tendermint](#) opened Full Node in early 2018 to create a space for development and collaboration as we build the future, together. Home to over 20 companies, you'll find a center of decentralized technology in Berlin.
